

SOLUTION

PARTNERS

Solution Partners helps companies find extra technical horsepower – individuals or whole teams with technical, interpersonal and project leadership skills you need to achieve your outcomes.

Solution Partners delivers permanent placement, consulting and temp to perm horsepower via master recruiters and a large database of established professionals in a full range of functional roles in our core disciplines of Analytics, Application Development, .NET, Project Management, and Quality Assurance.

Don't let your business initiatives slow to a crawl for lack of qualified and motivated technical talent. Supplement the current operations team, inject specialized expertise into a project team, or configure a whole team to tackle entire programs.

AREAS OF SPECIALIZATION

Analytics

Our Analytics Practice expertise is in staffing temporary, consulting and permanent positions that require superior analytical talent and the use of advanced quantitative/modeling techniques and technology in business decision making.

Application Development

Custom Application Development formed the backbone of Solution Partners' services when we were founded 11 years ago. When no packaged software can quite provide the solution you need, custom application development can close the gap. We have successfully contributed to Application Development on a large variety of platforms at large enterprises including initiatives in Java, Microsoft .NET, IBM Mainframe, SAP, JD Edwards, PeopleSoft, Oracle Financials, and many others.

Infrastructure and Deployment

Solution Partners assists customers with systems integration, installation and startup services, migration support, hardware and software support, outsourcing, recovery services and more. By providing support during solution planning, architecture design, implementation and integration we have helped our customers achieve their long term business goals.

Project Management

While program management can be defined in many different ways, Solution Partners' checklist for project management competence includes what clients have defined as the following core dimensions:

- Requirements definition
- Resource prioritization
- Budgeting
- Vendor negotiations
- Scope management
- Management and coordination of project activities
- Reporting
- Regulatory compliance

Quality Assurance/Test Automation

For the past twelve years, Solution Partners has provided IT departments and software companies with a variety of QA and test automation expertise. Solution Partners provides expertise and talent in the following areas:

- Unit Testing
- Business Function Testing
- System Integration Testing
- Regression Testing
- Performance Testing (Load, Stress, Capacity and Reliability)
- Time, Financial and Deployment Management
- Build complex workflow processes
